

Arts & Skills

This course offers students a unique experience on developing Approaches to Learning (ATL) skills, setting the stage for success in their academic journey and beyond. By empowering students to regulate their learning, this holistic approach fosters confidence and helps them navigate their educational paths independently and effectively. While the primary emphasis is on honing ATL skills, students will also explore the arts as a means of creativity and expression, providing inspiration for choosing Group 6 subjects in the DP, such as Visual Arts, Music, and Film, at either Higher Level or Standard Level.
